Located in :Glenvista Shopping Centre, Glenvista, Johannesburg South, 2058

Address : Glenvista Shopping Centre

Phone :[011 432 7289](tel:0114327289)

Website goals and objectives:

The objectives of the website, are to provide more information about the origins of the business, more about the owner and their contact details, and also to educate the user on what type of service and goods the business offers. The goal is to attract new customers, and inform people about this business also to provide a professional outlook of the business

The KPI's:

- Spoilage and waste rate
- Inventory turnover rate
- Quality of Fruits and vegs
- Customer experience
- Loyal customers

Current Website analysis: T

his business does not have a current website

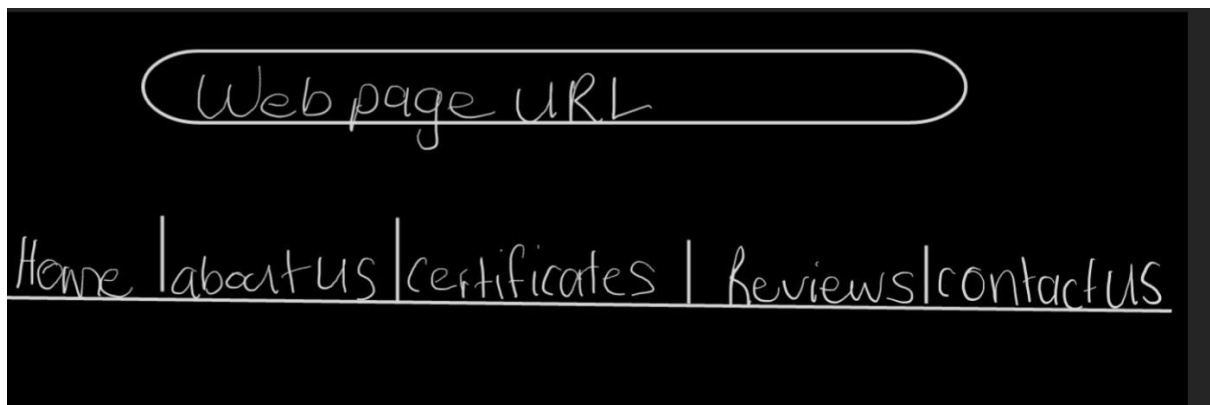

Proposed Website Features and Functionality:

The website will have a homepage that will contain the business purpose and the products or services that they will offer. The next page will show information about

the Owner and her qualifications, and just a “get to know” paragraph there will also be a link to the next web page that will contain the business location, connect information like email and phone number with all the businesses social media account links, the next page will have all the reviews good and bad from the previous customers from platforms like hello peter, google reviews and so on. The last page will have all the certificates of authentication and all the credentials of the business

Design and User Experience:

The colour scheme of the website will match the colours use in the businesses logo with will be attached below, the typography of the web page will be decided by the owner but for now just the normal ariel font. The layout and design will be done in a systematic order will no empty random blank spaces left, it will have a professional look. The user experience, will be easy for the user to use with visuals/ buttons taking them to the next page and also tabs if they only want to view a specific page.

Technical Requirements:

I will be using HTML for the layout, CSS for the styling and JavaScript for the combination of the html and CSS.

Timeline and Milestones:

I will start the development of the website on the 1st of April 2026

I should have the structure and general layout of the webpage code on the 13 of April

I should be adding finishing touches on the 18th of April
submission on the 20th of April

Budget:

R 8000-R100000
